

Gratuity Calculator

Flow

on tap of blue underlined fields user can change numbers using the key pad.

key pad always shows

as user types calculations happen

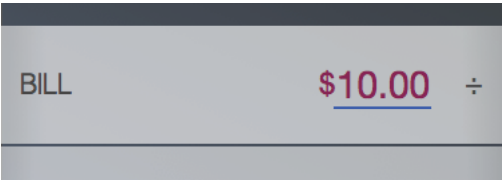

widget slides in as screen greys

on tap of x the split number reverts to 1 and only shows total number

the x changes back to a ÷ icon

as user types calculations happen

ex:

GLOBAL GESTURES

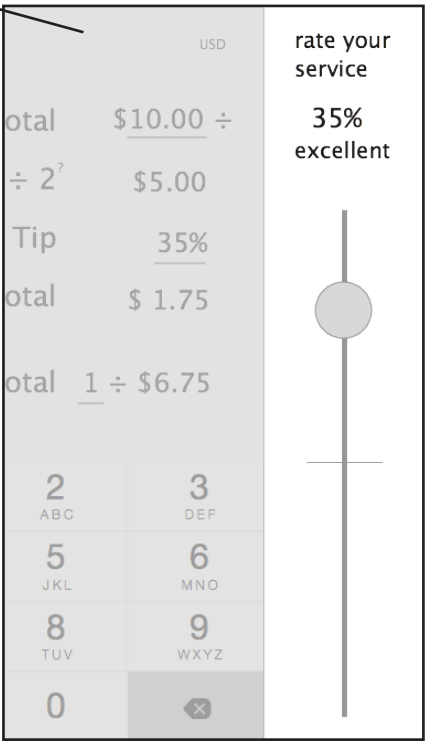

tap selects number

loads with prior numbers (always starts with ÷ 1), if no prior numbers starts with defaults:
\$10.00 (bill), 15% and ÷ 1

key pad always shows

÷ # = 1-9
% # = whole 1 - 50
\$ Numbers = 1.00 - 999.99

Decimal point is automatically in place
ex: user would type in 1234 for \$12.34

user can drag slider to change value. Value also changes in background/main app screen.

1-12% = poor

12-22% = good

23-49 = excellent

when user taps on main window that is greyed out the widget closes and main screen shos full screen again
